1. Open Java console

2. Run CarDealershipManagementSystem class

3. Choose whether you are a customer or employee (enter the number on the list and press enter)

4. If you are logging in as a customer, there are ten customers already there with employee IDs C001 through C10, so choose one and enter it into the console and press enter.

5. If you are logging in as an employee, it is the same as a customer, except the IDs are E001, E002, etc.

6. Continue using the numbers next to the functionality you want to test and press enter after

7. When you want to exit the program, return to the main menu in the same way as selecting a different functionality of the system. Then enter "3," and press the enter key

** The VINs are also in the same format as the customer and employee IDs (i.e., VIN001, VIN002, etc.)
